

Batchwood Golf And Tennis Centre

New Build & Refurbishment

Total value £679K

Willmott Dixon Construction Ltd were asked by St Albans City & District Council to rebuild their tennis centre that had burned down. The building project involved refurbishing the existing squash court building and building a new tennis and leisure building.

- TV and AV systems
- Fire Alarm system
- Public Address system
- CCTV system
- Intruder alarm system
- Induction hearing loop systems
- CAT6A data system

Wadys delivered the following services:

- Distribution systems, sub-mains and small power
- Containment for all services
- High efficiency and LED lighting internal and external
- Dali digital lighting control system

The concept internally was to leave all services highly visible, this meant a high degree of accuracy and finish was required for basic items such as cable trunking and cable basket. We received very good feedback from Willmott Dixon and the client.

Bassmead Manor Wedding Venue

New Build & Refurbishment

Total value £117K - 2014

Wadys have recently completed an extension and renovation of Bassmead Manor Wedding Venue, located in the picturesque village of Staploe in Cambridgeshire. Contracted by Modplan Ltd and in association with Lewandowski Willcox Architects, Wady's were tasked with the electrical design and installation of the various systems listed below. Bassmead Manor Barns was designed as a unique venue to provide the most idyllic country setting for wedding receptions and to compliment the 300 year old ceremony barn. The barns stand within the medieval moat of an ancient manor house surrounded by open countryside. The Wedding Venue consists of fully fitted commercial kitchen, office, licensed bar, honeymoon suite, en-suite, reception area and an oak framed dining barn capable of seating 150 people. Externally there is a large car park and garden area which we have provided lighting to.

Our works included the following services:

- Electrical design
- Distribution systems
- Lighting/emergency lighting installation
- Power installation
- Fire alarm system
- Audio sound system
- Intruder alarm system
- CCTV system
- Nurse call system
- Data infrastructure
- Terrestrial TV system

Wadys delivered the project on time and on budget. *Bassmead Manor Barns has also been awarded the Building Design and Restoration – CPRE Mark for the renovation and construction of farm buildings into a stylish destination wedding venue, including the use of traditional building materials, the construction of a timber framed building - using top quality materials and paying respect to its history and surroundings.*

- Power installation
- Fire alarm system
- Intruder alarm system
- Data infrastructure

Wadys delivered the project on time and on budget.

“At £750k this is definitely not one of the biggest projects we’ve undertaken on a Design and Build basis, but it’s shaping up to be one of the best! Our early engagement has enabled us to fully align to the client’s requirements with a real team effort from all partners, ensuring we deliver a building of the highest quality in both design functionality and workmanship. This really does feel like a community project with most trades personnel living within a ten mile radius of the site.”

Director Ashe Construction Richard Clay
